We initially had a pool of over 150 yearlings that we first liked after going through the catalogue for the first time. Through consultation with Geoff Connor our bloodstock guru, we narrowed the pool down to 40 odd yearlings that scored high grades through the breeding on each horse's dam.

From there we visited the stud farms and then spent 3 days looking at the final pool of yearlings at the Magic Millions on the Gold Coast. That list of 40 odd was then culled to 20 as Tony marked the horses down on type and imperfections in their composition.

On the day of the sale we had our vet from Sydney come visit the last 20 horses and with x-rays in hand, that list was finally reduced to 14 colts and fillies.

What you see is approximately 4 weeks of detailed examination of bloodlines and horse flesh. The 4 yearlings are 100% fit, come with great temperaments and have the best opportunity to show their owners what they are capable of.

We wish all our clients who purchase shares in any of our new yearlings the best of luck in their futures.

Special thanks to Tony, Geoff and Allan for the effort they put in over the 4 weeks, without their expert knowledge these 4 yearlings you see wouldn't have been available.
